EDUCATION

Brock University

Honors B.Sc. Computer Science Co-op

September 2022 – Present

St. Catharines, Ontario

- Relevant Courses: Data Structures and Algorithms, Artificial Intelligence Systems, Web Technologies (Full-Stack), Computer Networks, Database Systems, Software Engineering

SKILLS

Programming Languages: Java, Python, C++, PHP, JavaScript, HTML/CSS, SQL, Bash, Twig

Frameworks & Libraries: Laravel, PyTorch, NumPy, Pandas, Tree-sitter, Apache Spark, Playwright, PPTXjs

Platforms & Tools: Docker, Odo, Drupal 10, MinIO, REST APIs, Git, GitHub, Postman, Linux, VS Code, Azure DevOps

WORK EXPERIENCE

Software Engineer

Norgen Biotek

May 2026 – August 2026

Thorold, Ontario

- Architected a containerized document pipeline in **Docker** integrating **Odo** and **MinIO** via **S3-compatible REST APIs** in **Python**, implementing **Laravel** and **RBAC** in **PHP** to automate cross-departmental file routing and reduce administrative overhead.
- Implemented a custom **JavaScript** browser extension integrated with the **Gmail API**, deployed across **15+** corporate workstations to automate repetitive email workflows and duplicate tracking.
- Developed automated website end-to-end test suites using **Python** and **Playwright**, covering **25+** critical user flows and reducing manual QA verification time by **70%**.
- Built a local presentation viewer using **HTML**, **JavaScript**, and **PPTXjs**, integrating headless **LibreOffice CLI APIs** to dynamically batch-convert **100%** of multi-slide **.pptx** decks to **PDF** for reliable in-browser rendering.

Full Stack Developer

Norgen Biotek

January 2025 – August 2025

Thorold, Ontario

- Designed and developed responsive NGS service and product pages using **HTML**, **CSS**, **JavaScript**, and **PHP**, increasing organic inquiries by **20%** and improving overall site usability.
- Optimized **Google Merchant Center**, resulting in a **342%** increase in clicks and **765%** increase in impressions year-over-year, significantly boosting product visibility and sales potential.
- Improved SEO performance in **Drupal 10** by refining content, restructuring pages, and publishing SEO-optimized scientific blogs and publications, contributing to stronger organic search visibility.
- Integrated Google Sign-In as a partner, driving **70%** of all new website registrations within the first week of launch.

Web Developer

Niagara Islamic Community Center

March 2024 – July 2024

Thorold, Ontario

- Developed an outlet web application using **WordPress** and **CSS** which boosted engagement by **100%**.
- Collaborated in weekly meetings to maintain agile workflow and taught summer camp students coding.
- Fostered an inclusive and friendly environment for children and developed leadership skills through on-the-spot thinking and critical analysis of execution.
- Developed strong project management skills through summer camp and workshop planning and activities.

PROJECT EXPERIENCE

IntegriCode – Code Comparison Website [🔗](#) | *Python, Tree-sitter*

- Engineered a multi-threaded code analysis engine in **Python** supporting **Java**, **C**, and **C++**, executing parallel comparators via **ThreadPoolExecutor** to compute weighted scores across **Tree-sitter ASTs**, **Levenshtein** token edit distance, and **Jaccard** identifier overlap
- Designed an automated boilerplate exclusion algorithm with sliding-window overlap filtering ($\geq 60\%$) to strip instructor templates while preserving unique student logic, reducing false positives across a **99.1%** test pass suite

AI Bitcoin Fraud Detector Research Project | *Python, PyTorch*

- Researched **Graph Convolutional Networks GCNs** using **PyTorch** with **Google Colab** to classify fraudulent Bitcoin transactions on the Blockchain network.
- Built and trained a GCN model using Blockchain data, leveraging graph-based relationships for fraud detection.
- Discovered dynamic GCN models more accurately utilize time-based data proving more effective in real world applications compared to static models.

Connect 4 Game | *Java, Java Swing, Sockets, Multithreading*

- Created a multiplayer Connect-4 game with an interactive **Java Swing GUI** and a terminal-based version using sockets for real-time communication using **Java** with **IntelliJ**.
- Implemented server sockets and **multithreading** to support multiple players over a **TCP/IP server**.
- Ensured reliable gameplay experience with **client-server communication** and comprehensive error handling.

EXTRACURRICULARS

Club Executive – Graphics Designer

March 2024 – September 2025

Brock University Computer Science Club

St. Catharines, Ontario

- Designed engaging posters, merchandise, and website mockups using Canva and Figma, strengthening brand consistency and boosting event marketing and attendance.
- Collaborated with the marketing team in weekly meetings to support club revamp efforts, including charter development, event planning, and strategic initiatives.
